1. This office action, in response to the remarks filed 1/12/2009, is a final office action.

Response to Arguments

2. The previous objection to the claims is withdrawn in view of the remarks.
3. Applicant's arguments filed 1/12/2009 have been fully considered but they are not persuasive. Applicant has not pointed out how the prior art apparatus is different in terms of structure than the claimed apparatus. It is not clear how the claimed apparatus is patentable distinct from the prior art. MPEP 2114 states apparatus claims must be structurally distinguishable from the prior art as well as stating a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus. The structural components are the same in the prior art as the claimed invention.

In addition, the prior art discloses Annex A of G.992.1 specifies a PSD mask for overlapped spectrum operation as well as a PSD mask for non-overlap spectrum (page 18, lines 19-23). Therefore, the spectral shaping is performed according to the PSD mask for either overlapped spectrum operation or non-overlapped spectrum. The selected masks are used according to the deployment of the system's components (page 19, lines 13-30). Also, the recited limitation of "comprising one of: CO deployment and remote terminal deployment" is not limiting since the "CO deployment and remote

Art Unit: 2611

terminal deployment” are but two of the countless modes of operation that are permitted by the “comprising” language of claim 13.

For these reasons and the reasons stated in the previous office action, the rejections of the claims are maintained.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1-13 are rejected under 35 U.S.C. 102(a) as being anticipated by the instant application's disclosed prior art.

Regarding claims 1-13, page 2, lines 13-21 of the instant application's disclosed prior art describes an ADSL system and central office that performs spectral management under the requirements of Annexes A and C of the G.992.1 Recommendations (page 3, line 27 to page 4, line 20). The standards incorporated by reference in the instant application's disclosed prior art further describe this system. Page 4, lines 8-20 states the ADSL system will manage the power spectral density about the POTS frequency band. Break points are stored in the system to allow the management of the power density spectrum. Annex A of G.992.1 specifies a PSD mask for overlapped spectrum operation as well as a PSD mask for non-overlap spectrum (page 18, lines 19-23). This system can receive an input to generate any plurality of

Art Unit: 2611

break points that are desired. Specific break points of a power density spectral mask are not components of an apparatus or system.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
